

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- NA/I
a.k. enter
12/21/04
1. (Cancelled)
 2. (Previously presented) The process of claim 15 wherein R₁ is phenyl.
 3. (Previously presented) The process of claim 15 wherein said solvent comprises an alcohol, an alkyl alkanoate, a ketone, or an ether.
 4. (Previously presented) The process of claim 15 wherein said solvent is an alkyl alcohol having 1 to about 5 carbon atoms.
 5. (Previously presented) The process of claim 15 wherein said alkyl alcohol is isopropanol.
 6. (Previously presented) The process of claim 15 wherein said acid resolving agent is a derivative of D-tartaric acid.
 7. (Previously presented) The process of claim 15 wherein said acid resolving agent is a tartaric acid derivative having formula HO₂CCH[OC(O)R₃]CH[OC(O)R₃]CO₂H wherein each R₃, independently, is aryl having 6 to about 28 carbon atoms or aralkyl having 7 to about 28 carbon atoms.
 8. (Previously presented) The process of claim 7 wherein R₃ is aralkyl having 7 to about 28 carbon atoms.
 9. (Cancelled)
 - 9 10. (Previously presented) The process of claim 15 further comprising reacting said *d-threo* acid salts with aqueous base to form said *d-threo* piperidine acetamide.
 - 10 11. (Previously presented) The process of claim 10 further comprising reacting said *d-threo* piperidine acetamide with an alcohol having 1 to about 5 carbon atoms in the presence of acid to form a *d-threo* piperidine acetate.
 - 11 12. (Previously presented) The process of claim 15 wherein said *d,l-threo* piperidyl acetamide stereoisomers are prepared by reacting a pyridine having formula:

with hydrogen in an alkanolic acid having 1 to about 10 carbon atoms in the presence of a catalyst to provide a mixture of *threo* and *erythro* piperidyl stereoisomers; and

contacting said *erythro* stereoisomers with organic base, thereby converting said *erythro* piperidyl stereoisomers to *threo* piperidyl stereoisomers.

13. (Previously presented) The product of the process of claim 15.

14. (Cancelled)

15. (Previously presented) A synthetic process for preferentially forming *d-threo* acid salts of *d-threo* piperidyl acetamide stereoisomers with respect to *l-threo* piperidyl acetamide stereoisomers comprising the steps of:

providing a mixture of said *d,l-threo* piperidyl acetamide stereoisomers having formulas:

wherein R₁ is aryl having about 6 to about 28 carbon atoms;

reacting said stereoisomers with an acid resolving agent in an organic solvent, thereby forming acid salts;
precipitating said acid salts; and isolating said acid salts.
